<https://bit.ly/2MtrqN1>

Product Manager

SAP

Apr 2015 - Jun 2019 (4 years 3 months)

Inside a Global Team of Product Managers, defining the roadmap of the products of the SAP Analytics portfolio.

Evangelizing the strategy and providing support to the Field and the Customers in EMEA/APJ regions.

Specialized on SAC (All Machine Learning « Smart » Features), also worked on SAP Lumira, BusinessObjects 4.2 (Web Intelligence) and SAP BI Mobile.

Product Expert

SAP

May 2014 - Apr 2015 (1 year)

Building demos on the new BI products of SAP (essentially SAP Lumira and SAP Infinite Insight) as well as elaborating on the new projects of the Applied Research pole.

- Interview with Key Users, identifying the customers needs.
- Creation of the resources, imagination and formulation of end to end scenario matching with the customers requirements.
- Conception of step by step videos.
- Elaboration of new features participating to the conception of the Proof of Concept.
- Validation of the new features with the Team.

Product Owner

SAP

Jun 2013 - May 2014 (1 year)

In charge of the products Information Design Tool and Data Federator of the SAP BusinessObjects BI 4 Suite.

- Interact with customer representatives to identify the requirements that define the Product Backlog of the future versions.
- Create the User Stories for the new functionalities.
- Drive the User Stories implementation towards success from Sprint Planning to the Sprint Review.
- Prioritize the bug fixes to improve the quality and review the incidents to support the customers.
- Ensure the content is delivered on time with quality (Quality/Content/Delivery).
- Interact with transversal teams abroad in order to define and implement the shared components.

Software Testing Engineer

SAP

Oct 2008 - Jun 2013 (4 years 9 months)

As a member of a SCRUM implementation team, I work on the Semantic Layer products (Information Design Tool, Translation Management Tool) of the SAP BusinessObjects 4 Suite.

Mainly focused on the Framework part of the product (Connectivities, Universe Publication, Enterprise Deployment Scenario):

- Specification of the testing strategy,
- Development and Execution of the tests (manual, automated),
- Tests development of the Authoring SDK.

Product Owner of MyLab which is an internal tool that enables resource landscape management, during one year.

Java Software Engineer

SAP BusinessObjects

Feb 2008 - Aug 2008 (7 months)

Developing and maintaining tools to help the products documentation publication process using tools like Java, Ant, XML, XSLT, DITA.
